

BORDA'TAC

BORDATAC WITH 2, 3 OR 4 TACK FACILITY AND VERTICAL STITCH ON-LINE TARGETING SYSTEM

BORDA'TAC

Borda'Tac with 2, 3 or 4 tack facility and vertical stitch on-line targeting system

The new and innovative BORDA'TAC Mattress Border Side Stitching machine with Vertical Stitch On-Line Targeting System is designed to replicate a luxurious hand-stitched border – the trademark of a high quality mattress.

The BORDA'TAC will produce a mattress border in less than six minutes by operators. It can produce mattress borders with either two or three tack designs on materials up to 255mm in width or on the 4 tack system on borders up to 350mm in width.

The On-Line Targeting System automatically senses the vertical stitch line created by a Vertical Border Machine and automatically activates the twin sewing heads which stitch directly onto the vertical stitch line.

The BORDA'TAC will enhance the quality of your product and place your company in a profitable and prestigious market sector.

- ❖ Less than six minutes for a mattress border.
- ❖ Two, three or 4 tack design facility.
- ❖ Total computer control.
- ❖ Lucrative prestigious market.
